叶津川橋梁

Kanozu River Bridge

自分好みの構図を探そう！

ゆるやかなカーブを描いて集落を貫く全長372mの叶津川橋梁。北東から浅草岳方面を撮ってもいいし、カーブ部分を橋脚のそばで見上げて広角で撮っても、南東から蒲生岳方面を狙ってもいい。自分好みのアングルを探して何度でも足を運びたくなるスポットだ。

叶津川橋梁の南東から北側を撮影。秋と冬が同居する風景
Shoot the north side from the southeast side of the Kanozu River Bridge. Autumn and winter can both be seen in the scenery.

Look for your favorite composition!

The 372-meter long Kanozu River Bridge draws a gentle curve running through a hamlet. You can capture Mt. Asakusadake from the northeast, or use a wide-angle lens and shoot from an angle looking up at the bridge curve from the bridge pier, or aim at Mt. Gamodake from the southeast. Looking for your favorite angle will bring you back to this spot again and again.
